Labs — Human-AI Collaboration with Always On AI Agents

The story: you are the founder-CEO of Kopi Kaki Co., a fictional Singapore kopi startup opening its Tiong Bahru flagship on 1 Dec 2026. AI agents help you start it — three mandatory topics and one bonus topic, one workspace (`~/kopi-kaki`).

Copy-ready prompts: open the Lab Prompts page (also online on the course GitHub Page) — pick a lab, click **Copy**.

Each folder contains `README.md`, `LAB-<code>-Instructions.pdf` (printable, every step and prompt), `COPY-PROMPTS.txt` and `data/` (mock company files, skills, role files and tools).

Topic 1 · Your always-on CEO assistant

Evidence to keep

- Lab 1: ONE Meta Muse or OpenAI Dots screenshot.
- Lab 3: ONE Hermes Desktop screenshot of your professional PPT.
- Lab 5: TWO screenshots — your Hermes Kanban board and the video it produced.

Conventions

- Prompts are plain English; terminal commands are marked `bash`.
- Hermes: in the chat box click + → Folder… and choose your kopi-kaki folder, then ask Mia to read and follow `AGENTS.md`.
- Nothing public is ever posted or sent without your explicit APPROVE.
- Platforms move fast — if a command differs on your version, check `--help` and the official docs (Hermes · Paperclip · OpenAI Dots).
